## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The examiner has considered the information disclosure statement (IDS) submitted on 29 July 2005.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 10 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claims 10 and 24 recite the limitation "location comprises a message queue". It is unclear how a location can comprise a list of messages.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-28, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Gatto et al., USPN 6,916,247.

With regard to claims 1 and 15, Gatto discloses a method for providing an authorization service (certificate authority) in a gaming network including gaming machines (column 2 lines 46-61), the method including publishing the availability of the authorization service on the gaming network, discovering by a service provider the availability of the authorization service, and processing one or more service requests between the service provider and the authorization service (column 10 lines 55-62), said service requests conforming to an internetworking protocol (column 3 lines 20-28).

With regard to claims 2-6 and 16-20, Gatto discloses the authorization service is a web service where service requests are WSDL formatted and UDDI registries are utilized (column 15 lines 33-56).

With regard to claims 7-12 and 21-26, Gatto discloses the authorization service can be local (column 10 lines 55-58).

With regard to claims 13 and 27 Gatto discloses the authorization service returning results (column 10 lines 55-59).

With regard to claims 14 and 28, Gatto discloses returning an access list for a set of client credentials submitted (identification presented) to the authorization service (column 10 lines 55-62).
